Fitness Training Services

Body Composition Analysis

Using state of the art impedance analysis, our trainers will break your body down into vital components in order to optimize its overall function with the prescription of an individualized program. You will be educated on

- **BODY'S TOXIC STATUS:** Many scientists are in agreement that the major cause of degenerative disease and cancer is internal toxicity.
- **LEVELS OF "TRUE" WATER RETENTION:** True water retention causes Fat POCKETS to form in specific areas of the body
- **LEAN BODY MASS:** Lean Body Mass (Muscles, Tendons, ligaments and Bones), dictates your basal nutrition needs and metabolic rate.
- **HYDRATION LEVELS:** Overall performance of the human body will drop by an average of 33% if insufficiently hydrated.
- **METABOLIC RATE:** This is the number of calories your body burns at rest in 24 hours.

*45 minute Private Consultation
Only \$35*
